

Blackburn® Grounding Clamps

T&B's new JWR and JDLI grounding clamps help contractors save time and reduce costs in ground connections.

The **Blackburn® JWR** combination ground rod clamp can replace up to 18 common parts used for connecting ground wires to the ground electrode. Installers should never be left without the clamp to finish the job.

- Constructed from bronze alloy and high-performance stainless steel bolt – UL listed for direct burial in earth/concrete
- Provides wide range of connection sizes, reduces downtime from missing sizes and lowers inventory costs
- 300+ pound torque capacity

Start taking advantage today of the new lay-in feature of the **Blackburn® JDLI** direct burial ground clamp. Installers can reduce installation time by more than 30% for difficult bends or continuous loops of ground wire.

- Constructed from bronze alloy and high-performance stainless steel bolt – UL listed for direct burial in earth/concrete
- Designed for easy installation, requires less effort to make difficult bends or continuous loops
- UL listed connections to ground rods, pipe or rebar up to 1"
